

The Power of We™

IP Office Basic Edition – PARTNER® Mode

Simplified Communications for Very Small Businesses

Overview

Avaya IP Office *Basic Edition – PARTNER® Mode* is the ideal solution for small enterprises that need more productivity with a professional touch. Basic Edition – PARTNER Mode incorporates the best from one of the world’s most popular phone systems – Avaya PARTNER ACS – with the flexibility, sophistication and expandability of our award-winning IP Office.

Many small businesses want the ability to grow, and with Basic Edition – PARTNER Mode, your communications are ready to do just that. Start with two extensions and expand to 100; begin with a single line and grow to 64. Increase capacities and features only as you need them. And with features like Caller ID, Dial-by-Name, Automated Attendant, Multi-Party Conferencing, Integrated Voicemail, and more, Basic Edition – PARTNER Mode will be right there with you, wherever your enterprise takes you.

Capabilities

Voicemail to email – Retrieve voice messages via email (voice messages show up just like an email) from a single inbox for fast and efficient access to information. Get messages from the keypad on any extension through the display on an Avaya 1400 series phone.

Call Forwarding – Forward calls to your office directly to your mobile or home phone so calls are never missed, even when out of the office.

Messaging, conferencing, and more – Automatically receive notification and listen to voice messages when out of the office. Quickly set up conference calls with up to 64 people to enable cost-effective collaboration.

Automated Attendant – Customize caller greetings so key clients receive a personal message and are routed directly to the most appropriate person or team.

Dial By Name – Callers can easily identify who they want to connect with by simply spelling that person’s name on their phone keypad.

Choose your connection – Basic Edition – PARTNER Mode supports analog lines, PRI/T1; and newer IP-base technologies such as SIP (Session Initiation Protocol) trunking, which can provide significant cost savings.

Benefits

- **Better customer service** – Through touch tone prompts, quickly route customers to the right department for fast, personalized customer experiences

- **Lower costs** – Select the connection technology that best suits your business, including Internet Protocol-based solutions such as SIP trunking that can save as much as 50% off monthly calling fees (results vary by area and service provider)
- **Investment protection** – invest in IP Office Basic Edition – PARTNER Mode now and know that you'll have a communications solution that will grow with you – in capacities and capabilities – as your business takes off.
